# Introduction

The CMIT is a professional credential recognizing practitioners who have displayed high educational achievement and the desire to learn how to become competent, successful Construction Managers. The CMIT is divided into 4 sequential levels, with each level demonstrating growing professional competence and experience in CM.

The CMIT designation demonstrates competence

# Structure of the CMIT Program

The CMIT program is divided into 4 sequential levels, with each level demonstrating a credential holder's growing professional competence and experience in the field.

CMIT L3 candidates are given three (3) attempts to pass each examination. On each attempt, they will be given two (2) hours to complete it. A score of 80% is required to pass each examination. Please note that scores are not rounded up and a score of at least 80% is required to pass each exam and earn the CMIT L3 designation. Candidates must complete all examinations within one year from when their application is submitted, but the candidate can take the exams any time between when they receive the instructions to one year from when their application was submitted.

After three (3) unsuccessful attempts on an exam, the individual will have to re-apply by submitting a new application and payment before they will be able to take an exam again. Candidates must meet all eligibility requirements in effect at the time of any subsequent application submissions.

### Providing Letters of Experience

Candidates for the CMIT L3 designation are required to provide letters of experience signed by their supervisor(s), superior officer(s), or a Certified Construction Manager (CCM) credential holder verifying that the candidate has at least six (6) months of experience in each of the CM practice areas required for CMIT L3: Contract Administration, Time Management, and Safety and Risk Management. Experience in each CM practice area is not required to be as responsible in-charge for the CMIT L3. CMIT L3 status will not be granted until a candidate has

provided letters of experience signed by a responsible person in-charge for the CMIT L3 designation.

## CMIT L3 Certificate

Once the CMIT L3 exams have been successfully passed by a candidate and the candidate has completed the soft skills and provided letters of experience verifying at least six (6) months of experience in contract administration, time management, and safety and risk management, the individual may then begin to use the CMIT L3 designation as they have effectively earned their CMIT L3 certificate. The certificate is valid for 7 (seven) years from the date that the candidate fulfills all requirements for the CMIT L3 designation.

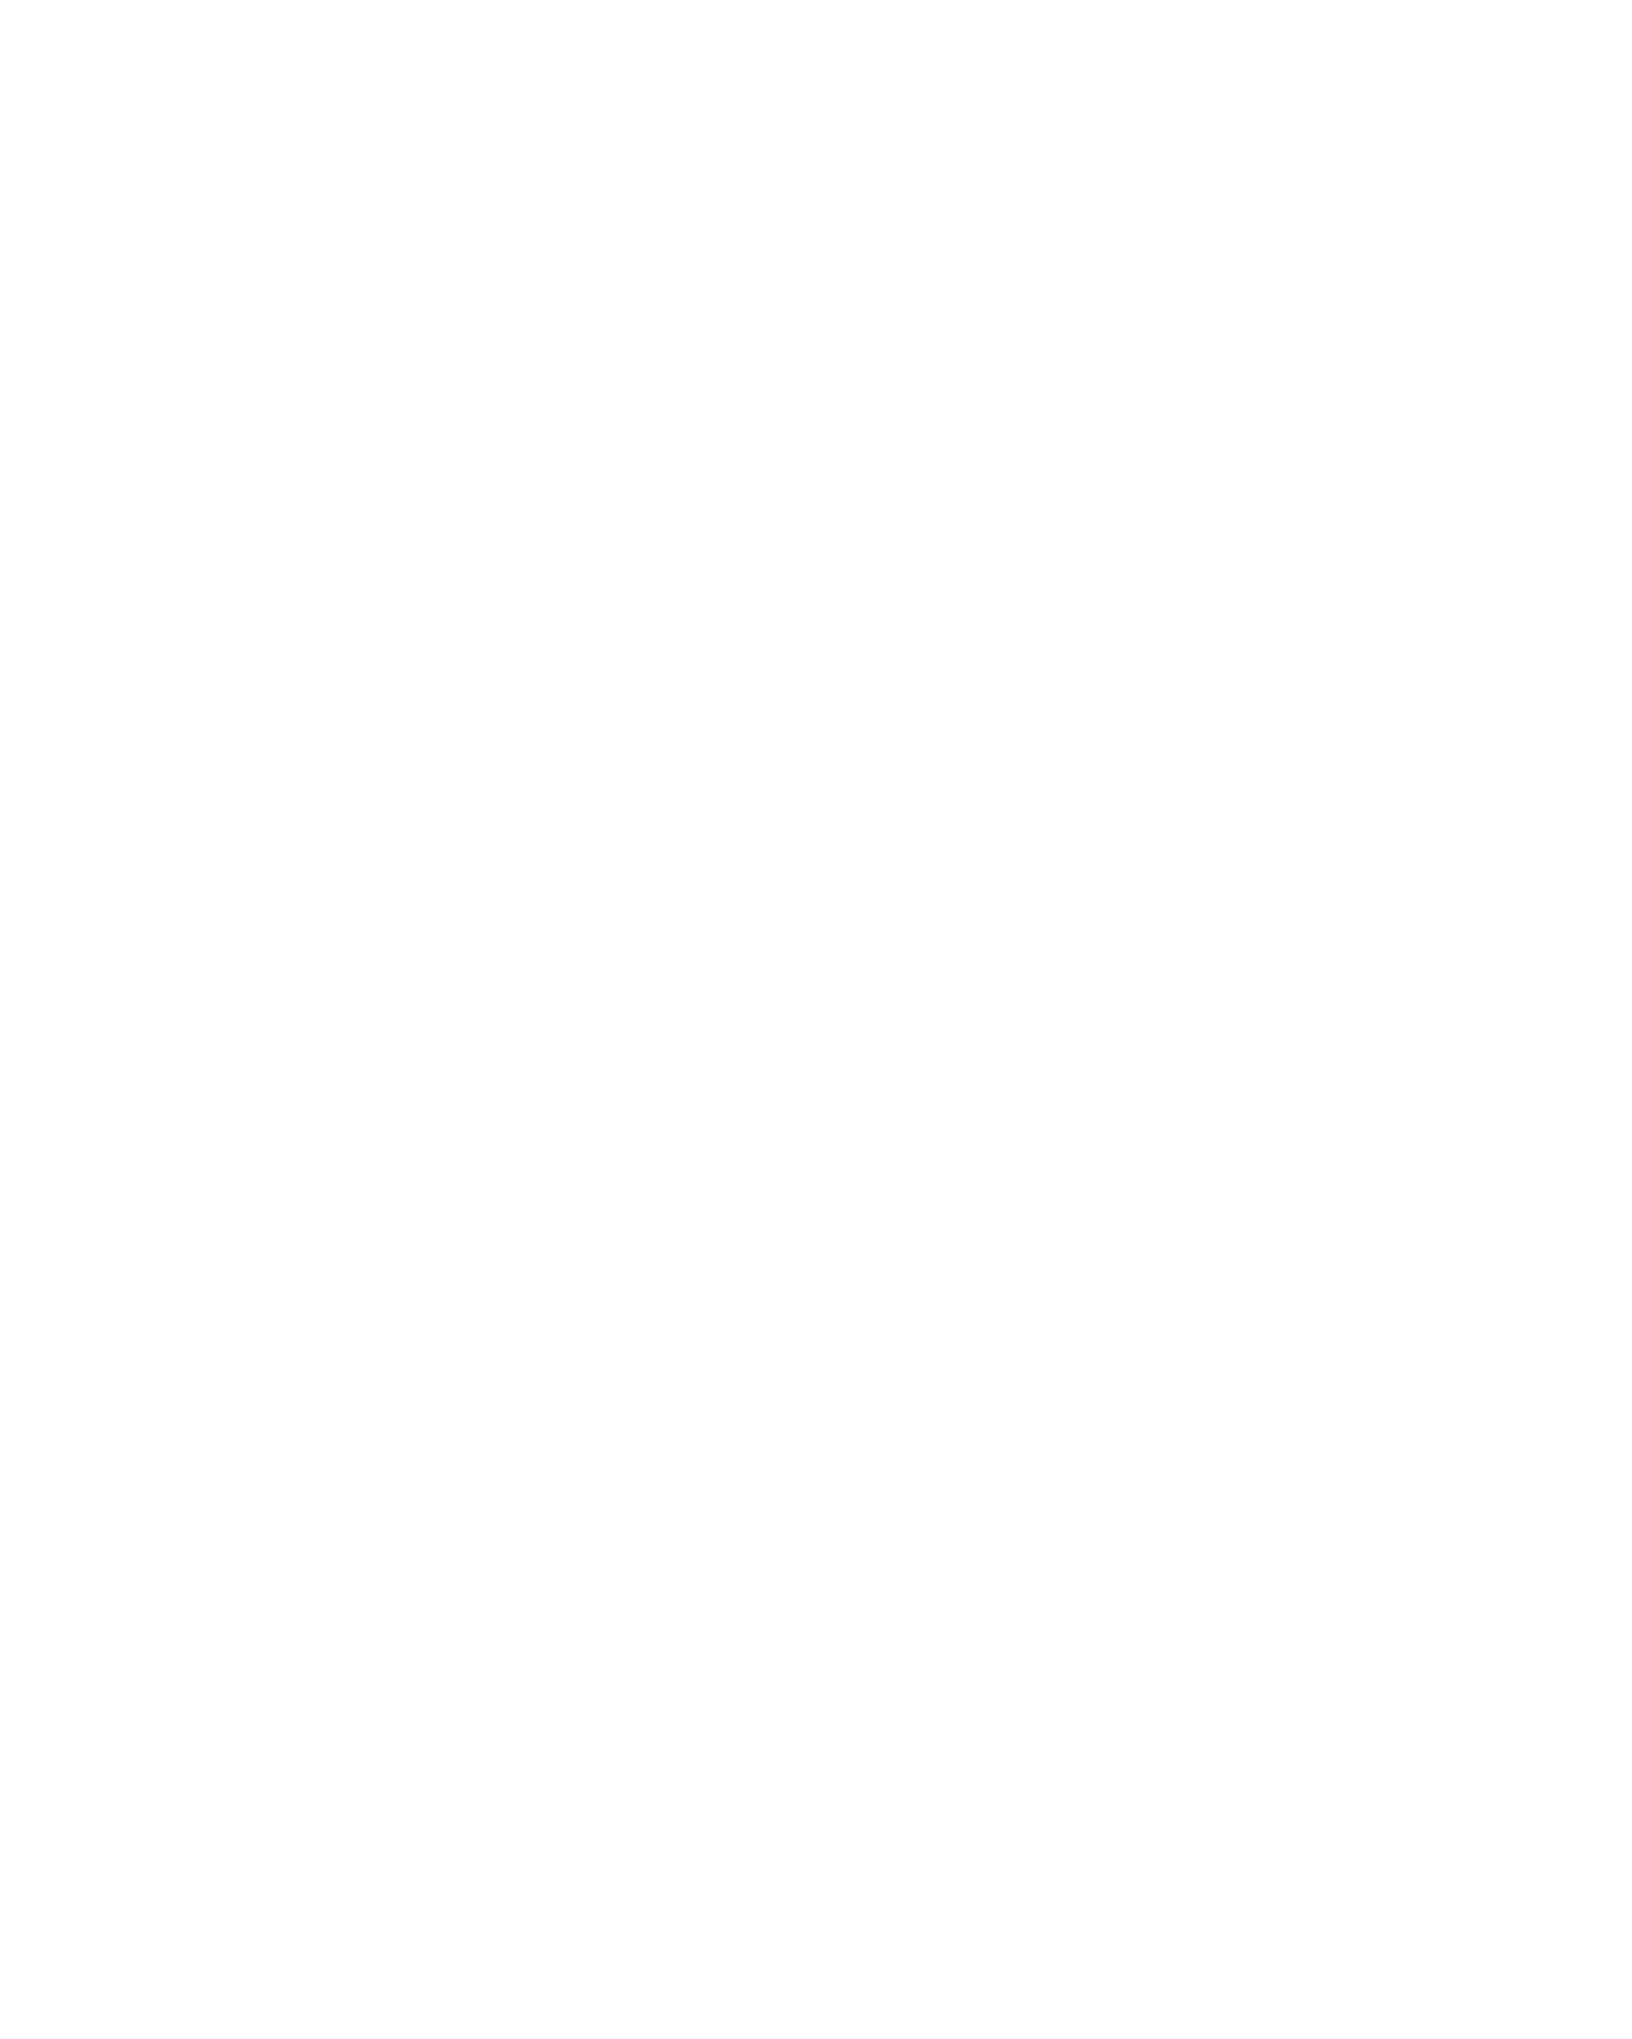

## CMIT L3 Digital Badge

CMIT L3s will receive an email from CMCI's partner organization, Acclaim, inviting them to accept and claim their digital badge. A digital badge is a way for CMIT L3s to exhibit their achievement and showcase their knowledge and experience. Digital badges can be displayed in emails, social media sites, and in online resumes or electronic documents. For more information about digital badging, please see CMAA's [website](#).

## Mentor Program

Additional information regarding the Mentor Program is available on the CMCI website at [www.cmci.org](#).

For more information, please contact the CMCI Mentor Program at [mentor@cmci.org](#).

## Construct on Manager-in-Training Level 3 (CMIT L3) Application

The Construct on Manager Certification Institute (CMCI®) is a wholly-owned subsidiary of the Construct on Management Association of America (CMAA™), which is a not-for-profit organization that formed in 1982 to promote the profession of Construct on Management and the use of qualified CMs on projects. CMCI's purpose, among others, is to serve the public and profession of construct on management through the establishment and maintenance of the CMIT® program.
