Transition

From the Military to Corporate Life

A PROMISING TRANSITION

Career transitions can be one of the most stressful events for both military and civilians. Military service provides an abundance of training, but how do you know what career will suit you in the professional world?

construction/project management. You've personally witnessed infrastructure marvels throughout the world, and now is your chance to lead teams responsible for building and improving them.

While certainly overwhelming, it can also present some exciting possibilities as you make important decisions about your future.

Your leadership and planning skills are ingrained throughout military service, and your adaptability and willingness to accept change enable you to transition successfully into a promising career in professional

Your leadership skills can transfer to new opportunities to lead teams to solve complex, unique challenges while utilizing your project management skillsets. You may have performed as an action of cer, training of cer, operations planner, commander, platoon

sergeant, or equivalent. Each of these roles can prepare you for entering the civilian world as a construction manager. You can provide value to an organization as a project manager specializing in construction.

Utilizing leading industry credentials can demonstrate to organizations the knowledge and experience you've obtained in the military. Earning the Construction Manager-in-Training certificate is your first step to transitioning to a successful career in the construction management industry. The CMIT designation demonstrates competence in the practice of construction management early in an individual's CM career.

For well experienced military personnel, the Certified
