## APPS IMPROVE OPERATIONAL EFFICIENCY AND STREAMLINE COMPLEX WORKFLOWS, AS LONG AS THEY CAN WORK TOGETHER

Like every other industry these days, construction businesses have been embracing digital solutions to conduct daily activities. Because of this digital transformation, application usage in the industry is steadily increasing.

Construction companies are increasingly relying on applications and digital solutions to work. Apps save time and

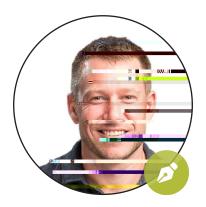

effort, enforce accountability and transparency, and streamline workf ows. The number of companies using applications (and the number of applications used) is growing year after year. The digital era has arrived in the construction industry in full force.

How are construction companies integrating digital solutions? According to the 2020 report, 22% of companies surveyed reported using six or more applications for their daily operations; 92% of construction industry workers use a smartphone for work; 49% of respondents have a dedicated IT department; and 65% of respondents also use a tablet for work purposes, and 83% use laptops.

These apps are usually accessed via cell phones or company mobile devices. According to the report, the most common uses

of app integration — can unlock new levels of productivity and efficiency.

App integration can help with time management. For instance, an employee can enter a timesheet into an app where the
